*To my grandmother, Tita
who bought me my first piano*

Dear Music Friend,

Ever since I can remember, whenever I felt off center or a bit stressed I would go to the piano and play. I want to share this experience with you. I have been teaching friends and family my piano teaching method for years. It is designed to enable you to play the piano beautifully in just one hour!

Music is the language of the soul because it is the expression of human emotion. Music is mathematical. Pythagoras said, "Astronomy and harmonics are sisters." As the planets whirl through space they produce their own sound. Our early mathematicians associated each tone with its sister planet in the heavens. The measurement between each tone was measured in the same degrees difference relative to the distance between the planets. In these early days the earth was considered the center of the universe. The scale we know as do re mi fa sol la ti do was first established by Plato.

Music teaches us that the universe is in perfect order and is designed to exist in harmony. Musical tones and colors are both identified by their vibrations and frequency. Beautiful music is to the ear as a brilliant rainbow is to the eye. As you go through this very simple teaching program I'd like you to think of the different tones as colors. All of the drama is in the space between the notes because it is in the space where we experience, happy, sad, frustration, love and beauty.

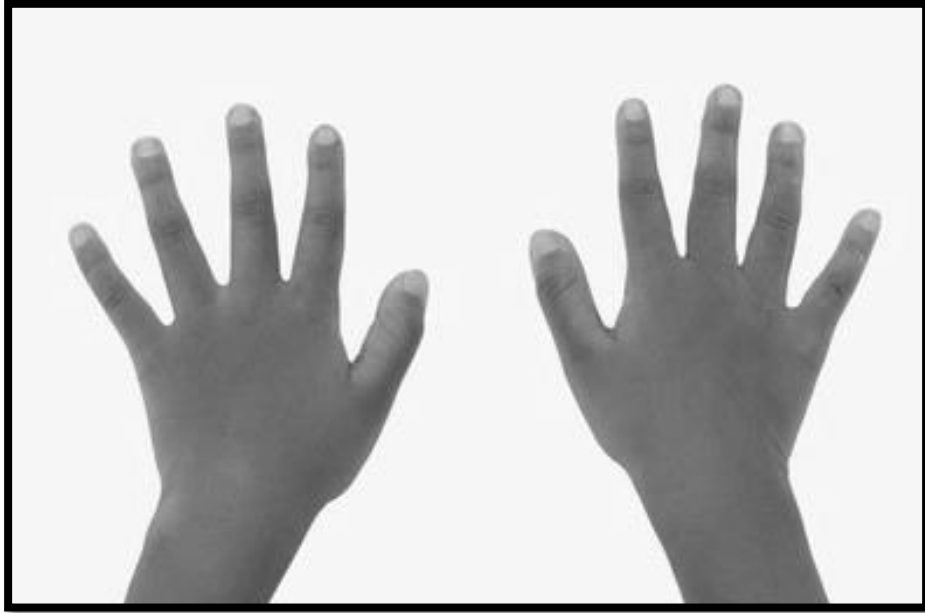

Like reading a book takes you on new adventures, reading music will enable you to play music that has been compose

Enjoy!
Cynthia

Fingering

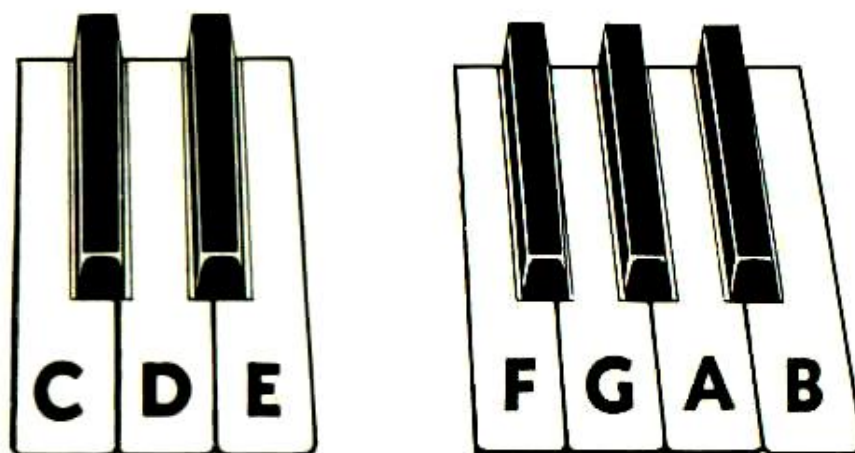

Most music is written with fingering. The small numbers written under the notes indicate which finger to use while playing. This makes it easier to play and your fingers don't get all tangled up.

For now, just know that on the keyboard:

- 1= thumb
- 2= pointer
- 3= middle
- 4= ring
- 5= pinky

Just 7 letters!

In this program we will be working with the Key of C because it is the key with no flats or sharps. This means we will only be working with the white piano keys.

The piano keyboard is really divided into 2 groups as shown above. The group of 2 black keys and the group of 3 black keys.

The CDE group is easy to remember because it is just 3 letters. C is in the front, D is in the middle and E is in the back.

In the FGAB group there are 2 white notes in the middle. When I was a little girl I imagined that the group of 3 black keys was a house. The “F” was the (F) front door and the “B” was the (B) back door. Inside lived a baby who said “GA” which is spelled G – A. It works for me!

Exercise:

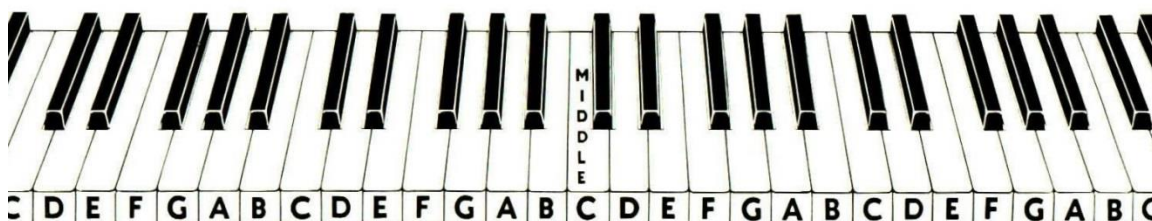

Locate all the C’s on the piano

The F’s... the A’s... the D’s...

The B’s... the G’s and now finally, the E’s.

Finding Middle C

K. Kawai

Middle C is the C located in the middle of the keyboard directly under the name of the make of the piano. It is the center note used to separate the keyboard in two.

Treble Clef

Middle C

Bass Clef

Above is how Middle C is written in music. All of the notes you see are a Middle C written with different time values. Each of the two groups made up of 5 lines and 4 spaces is called a staff. As you can see, if there was a line between the two staves it would be Middle C.

The lines and spaces on the staff with the Treble Clef tells us which notes to play beginning with Middle C and up. These notes are played with your right hand. Middle C with the note stems up tells us to play the Middle C with your right hand.

The Bass Clef tells us to play all of the notes beginning with Middle C and down with your left hand. Middle C with the note stems down tells us to play it with your left hand. I like to think of Middle C as the zero on the keyboard.

Playing the C Scale

	C	D	E	F	G	A	B	C
Fingers to use	1	2	3	1	2	3	4	5

To play the C Scale going up

Begin by putting the thumb of your right hand on Middle C.

Release as you play D with your 2 finger.

Release while you play E with your 3 finger.

With your 3 finger remaining on the note, rotate your hand to the left and cross your thumb UNDER the 3 finger.

Play F with your thumb.

Release as you play G with your 2 finger.

Release as you play A with your 3 finger.

Release as you play B with your 4 finger.

Finish while playing the C above Middle C with your 5 finger.

To play the C Scale coming down

Begin by playing the C above Middle C with your 5 finger.

Release as you play B with your 4 finger.

Release as you play A with your 3 finger.

Release as you play G with your 2 finger.

Release as you play F with your thumb.

With your thumb remaining on the note, rotate your hand to the left and cross your 3 finger OVER your thumb.

Play the E with your 3 finger.

Release as you play D with your 2 finger.

Finish right where you began with your thumb on Middle C.

Musical Tones Are Like Colors

We are going to work with the C scale.

C	D	E	F	G	A	B	C
do	re	mi	fa	sol	la	ti	do
Major	minor	minor	Major	Major	minor	diminished	Major

I like to think of the 1, 4 and 5 or in the C scale C, F and G as primary colors (red, blue and yellow). These are your major chords.

The 2, 3 and 6 or the D, E and the A are like the secondary colors (orange, green and purple). These are the minor chords written Dm, Em and Am.

When playing the C chord play the C with your thumb, the E with your middle finger and the G with your pinky. Use the same fingers for all the chords. Use this chart to get familiar with the different chords in the C scale.

C	C (thumb)	E (middle)	G (pinky)
Dm	D	F	A
Em	E	G	B
F	F	A	C
G	G	B	D
Am	A	C	E

In the C scale, the B is diminished chord and has a different kind of sound. It will be learned at a later date. Eliminate using it at all for now.

Playing Octaves

An octave is when you play the same note, 8 tones apart. To play a C octave play Middle C with your left thumb and the C below it with your left pinky simultaneously. Now play Middle C with the thumb of your right hand and the C above it with your right pinky simultaneously.

Octaves are two tones with the same name, played simultaneously. Now play octaves all over the keyboard alternating hands!

Play octaves with both hands saying the name of the note as you do.

Play the C below Middle C with your left thumb and the C below that with your left pinky simultaneously. This is a nice full sounding C octave. Hold it down as you play the C scale with your right hand. Press the sustain pedal (the furthest pedal on the right) to create an ambience. Play the notes slow and dramatically.

The C scale going down is the same sequence of notes as the Christmas Carol “Joy to the World”. Try it with the rhythm that follows the song. In other words as you play the C scale going down sing the words “Joy to the world, the Lord has come” in your head and play along.

Now, while holding down that same low C octave, play the white notes in any order with the different rhythms of our world. For instance as you play, think of the rhythm of a heartbeat, walking, running, rain, breathing, birds etc.. Long pauses between the notes can be beautiful and dramatic. Create a mood as you play!

PIANO PEDALS

1. The pedal on the far right is the SUSTAIN PEDAL.
When you press down on it makes the notes ring. It is a good idea to clear it every chord change or it will sound muddy. If you play the same chord for several measures clear the pedal every measure. A measure is the 1-2-3-4 beat or the 1-2-3 beat in a waltz.

2. The far left pedal is the SOFT PEDAL. When pressed down the hammer hits only 2 strings instead of 3.

Inversions

Inversions are like the different shades of blue, green, red, yellow, purple and orange. There are 3 ways to play a basic chord. These are called *inversions*. Because the chords share many of the same notes when you learn the inversion pattern it is easier to simply shift your finger slightly to find the next chord.

Let's start with the C chord. The notes are C, E and G.

When referring to the C chord: C is the root (the name of the chord)

E is the 3rd (the third of the C scale)

G is the 5th (the 5th of the C scale)

Root position plays the C chord C – E – G

First Inversion puts the “3rd” at the bass. E – G – C

Second Inversion puts the “5th” at the bass G – C – E

These inversion patterns apply to ALL chords. When adding a fourth tone it can also be put in any position. This is when creating music can be fun.

When you have mastered inversions of your favorite keys you can create music for hours. It is like having a pallet of paint and a blank canvass. Your canvass is the silence and the space between the notes will express your emotions.

If you have an electric keyboard with a transpose button all you need is to learn the 6 chords and complimentary tones of the C Scale.

C Scale Inversion Chart

Chord	Root Position	1st Inversion	2nd Inversion
C	C – E - G	E – G – C	G – C - E
Dm	D – F - A	F – A – D	A – D - F
Em	E – G – B	G – B – E	B – E - G
F	F – A – C	A – C – F	C – F - A
G	G – B – D	B – D – G	D – G - B
Am	A – C – E	C – E – A	E – C - A

To play First Inversion

Left hand: use fingers 5 - 3- 1

Right hand: use fingers 1 – 2- 5

To play Second Inversion

Left hand: use fingers 5 – 2 – 1

Right hand: use fingers 1- 3- 5

When playing Root Position, that is
the name of the chord is at the bass,
Use fingers 1 – 3 – 5 in both hands

When you learn how to play the inversions of these 6 chords with both
hands you will be ready to progress.

Compose Your Own Music

Now it's time to be *really* creative. Play that same C octave with your left hand and push down the sustain pedal. With your right hand play the notes of the C chord at random which are the notes C, E, and G. Play them in any order. Hold them down as long as you wish. Remember to make dramatic pauses.

Try it with all of the chords using the notes of the chord in any order, any sequence, and in any rhythm pattern. Try different combinations and remember them. These are *your* creations!

Left hand (bass)	Notes to use	Chord
C octave	C – E – G	C
D octave	D – F – A	Dm
E octave	E – G – B	Em
F octave	F – A – C	F
G octave	G – B – D	G
A octave	A – C - E	Am

With your left hand play the lower A octave. Now play the G octave. Hold your pedal down but clear it with an up-down motion when you change your octave. Otherwise the sound will be too muddy.

As you alternate back and forth from A to G, play all white notes in your right hand in any order. Find different patterns you like and remember the notes that work best. After you get comfortable with A and G you can add the F octave. As you create, use the C, Dm, Em F, G and Am chords. Find combinations *you* like. Let the music ring! Remember the drama is in the space between the notes.

The A minor Scale

(Am)

I chose to teach you with the Key of C because it only uses the white keys on the piano. It is also the Key of A minor. This is because A minor is the Relative Minor to C. The relative minor is always the 6th note of the scale. Songs written in minor keys sound a bit sad but they are so beautiful! For instance the song *Greensleeves* is written in a minor key.

The Am Scale is:

A B C D E F G A

The Relative Minor of every major chord is the chord that most compliments the chord and sometimes can even be used instead of the major chord.

All of the major chords have their relative minors present in every scale.

We learned that in the C scale the 6 harmonic chords are:

C Dm Em F G Am

Am = relative minor to C

Dm = relative minor to F

Em = relative minor to G

As you play the chords notice the notes the different chords share. For instance the C and Am chord share the C and E. The F and Dm chords share the F and A and the G and Em chords share the G and B. The F and C chord share the C, the G and C chord share the G and so on. This knowledge will serve you well.

Most importantly...HAVE FUN!

Timing

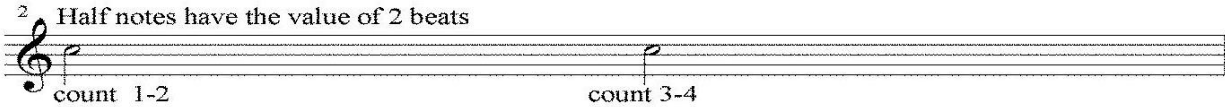

Voice

Quarter notes have the value of 1 beat

count 1 2 3 4

Half notes have the value of 2 beats

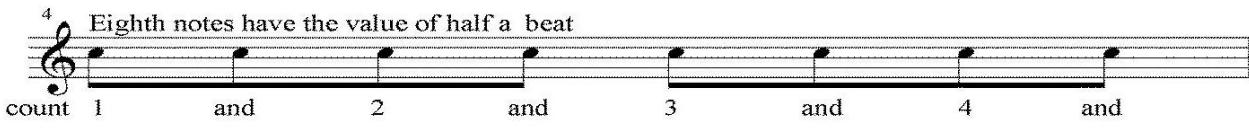

count 1-2 count 3-4

Whole note are held 4 counts

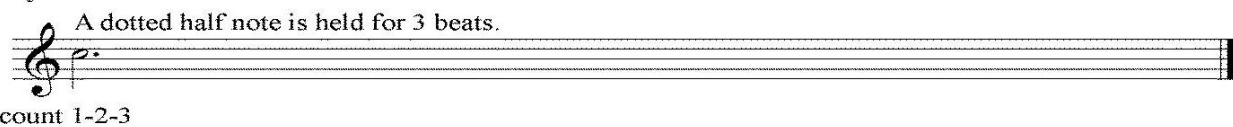

count 1-2-3-4

Eighth notes have the value of half a beat

count 1 and 2 and 3 and 4 and

A dotted half note is held for 3 beats.

count 1-2-3

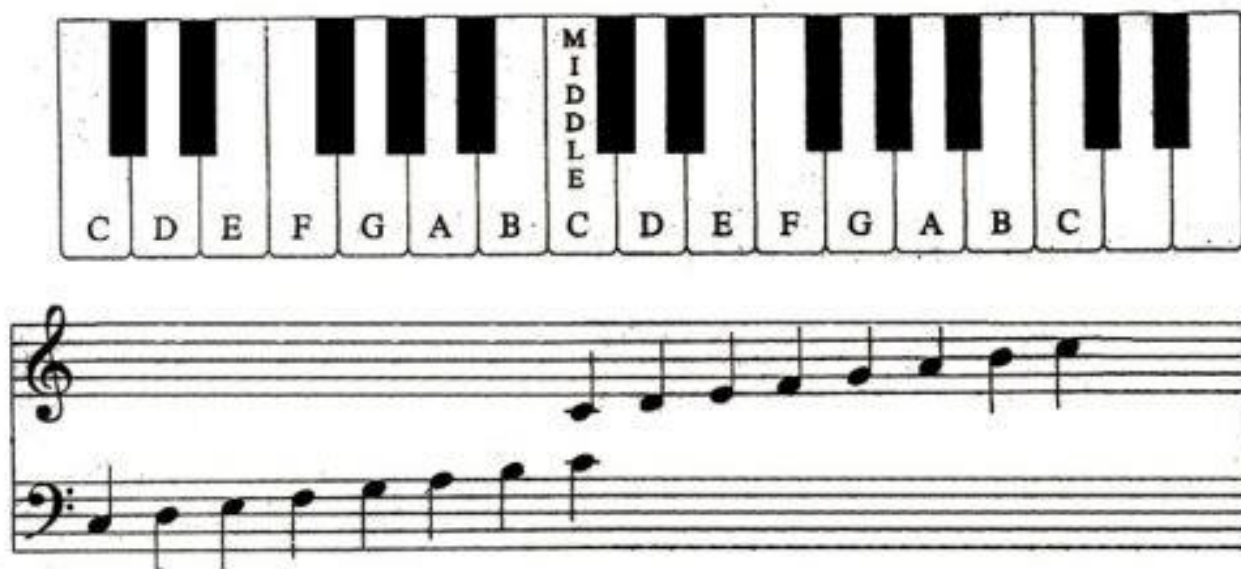

The Time Signature tells us how many beats in a measure and what kind of note gets 1 count. The time signature above tells us that there are 4 counts in a measure and the quarter note has the value of one count. All of the notes are the C above middle C. The first line shows quarter notes. They are filled in and has the value of one count, 1 – 2 – 3 – 4

The second line show half notes. Half notes are open notes with stems. Each has a value of 2 counts. (1 - 2) (3 – 4)

The third line shows a whole note which is an open note with no stem. It has a value of 4 counts (1 – 2 – 3 – 4)

A dot next to a note equals the value of the note plus half of its value. A half note has 2 counts, half of 2 is 1 and $2 = 1 + 1$. So a dotted half note gets 3 counts.

Matching the Notes

Every note written on the staff has a place on the keyboard.

The first note you see is the C and octave below Middle C. Notice it is on the third space below.

Now look at Middle C. It can be played with either hand.

The last note you see is the C an octave above Middle C.

To play *Lesson in C* first put your 5 finger on your left hand on the lower C and your right hand thumb on Middle C and play the C chord first with your left hand and then with your right.

Now do the same pattern with the Dm, Em and F chords.

Notice that all of the chords are written every other line or every other space.

Now that you have practiced playing the chords and saying the notes out loud, do it while looking at the music

Lesson in C

Notice that when the chord is written on spaces in the left hand, it is on lines in the right and vice versa. The C an octave away from middle C is always on the third space.

Lines and Spaces

The LINES and SPACES pages are designed for you to learn how to read the notes by associating them with the six chords you have learned from the C scale.

Positioned in the bass clef is the root of each chord. This means that if you are working with the Em chord the note you see in the bass clef is an E.

If you are working with the F chord the note in the bass clef is F and so on. For now play your bass notes with any finger. Say the notes out loud when you play them.

The lines and spaces pages are written in three quarter time also known as waltz time. I like to think of being on a swing. Count 1 – 2 – 3 1 – 2 – 3

Position your hand in “root position” (fingers 1 – 3 – 5) when playing the LINES and SPACES pages.

You’ve already practiced these chords. This will show you how they look in sheet music form.

When I first took piano lessons I learned my lines with: Every Good Boy Does Fine (E-G-B-D-F) in the right hand and the spaces spell (F-A-C-E).

For the left it was Girls Buy Dolls For Amusement (G-B-D-F-A) and All Cows Eat Grass were the spaces (A-C-E-G).

I think knowing patterns makes music easier to read. It’s one less step for your mind to remember.

Lines

Cynthia Jordan

Piano

C chord

The first system of music is for piano. It is in 3/4 time and features a C major chord. The right hand plays a melody of quarter notes: C4, D4, E4, F4, G4, A4, B4, and a dotted half note C5. The left hand plays a bass line of dotted half notes: C3, F2, C3, and F2.

5

The second system continues the melody from the first. The right hand plays: G4, A4, B4, C5, B4, A4, G4, and a dotted half note F4. The left hand continues with dotted half notes: G2, C3, G2, and C3.

9

Em chord

The third system begins with an E minor chord. The right hand melody consists of: G4, F4, E4, D4, C4, B3, A3, and a dotted half note G3. The left hand bass line consists of dotted half notes: G2, C3, G2, and C3.

13

C chord

The fourth system returns to a C major chord. The right hand melody consists of: G4, F4, E4, D4, C4, B3, A3, and a dotted half note G3. The left hand bass line consists of dotted half notes: G2, C3, G2, and C3. The system concludes with a double bar line.

Spaces

Cynthia Jordan

Piano

Dm chord

The first system of music is for piano. It is in 3/4 time. The right hand (treble clef) plays a melody of quarter notes: C4, D4, E4, F4, G4, A4, B4, and a dotted half note C5. The left hand (bass clef) plays a bass line of dotted half notes: C3, D3, E3, and F4. The system is labeled 'Dm chord' and 'Piano'.

5

The second system of music continues the melody from the first system. The right hand plays quarter notes: G4, A4, B4, C5, B4, A4, G4, and a dotted half note F4. The left hand continues with dotted half notes: G3, A3, B3, and C4. The system is labeled with the measure number '5'.

9 F chord

The third system of music continues the melody. The right hand plays quarter notes: E4, D4, C4, B3, A3, G3, F3, and a dotted half note E3. The left hand continues with dotted half notes: D3, C3, B2, and A2. The system is labeled '9 F chord'.

13 Dm chord

The fourth system of music concludes the piece. The right hand plays quarter notes: D4, C4, B3, A3, G3, F3, E3, and a dotted half note D3. The left hand continues with dotted half notes: D2, C2, B1, and A1. The system is labeled '13 Dm chord' and ends with a double bar line.

Recognizing intervals is the key to reading music. The numbers you see tell you what finger to use when playing the note. Play each hand separately at first s-l-o-w-l-y.

Playing With C

Cynthia Jordan

Position your fingers with the C octave position and play a full C chord

Piano

This musical exercise is written for piano in C major, 4/4 time. It consists of two measures. In the first measure, the right hand plays a C octave scale starting on middle C (C4), with fingers 1, 2, 3, and 5. The left hand has a whole rest. In the second measure, the right hand has a whole rest, and the left hand plays a C octave scale starting on C3, with fingers 5, 3, 2, and 1. The piece ends with a double bar line.

Position your fingers with C chord 1st inversion in both hands

This musical exercise is written for piano in C major, 4/4 time. It consists of two measures. In the first measure, the right hand plays a C chord in first inversion (E4, G4, C5) with fingers 1, 2, and 5. The left hand has a whole rest. In the second measure, the right hand has a whole rest, and the left hand plays a C chord in first inversion (C3, E3, G3) with fingers 1, 3, and 5. The piece ends with a double bar line.

Position your hand in the C chord root position

This musical exercise is written for piano in C major, 4/4 time. It consists of two measures. In the first measure, the right hand plays a C chord in root position (C4, E4, G4) with fingers 1, 3, and 5. The left hand has a whole rest. In the second measure, the right hand has a whole rest, and the left hand plays a C chord in root position (C3, E3, G3) with fingers 1, 3, and 5. The piece ends with a double bar line.

Position your hand in the octave position

This musical exercise is written for piano in C major, 4/4 time. It consists of two measures. In the first measure, the right hand plays a C chord in octave position (C4, E4, G4, C5) with fingers 1, 3, 5, and 5. The left hand has a whole rest. In the second measure, the right hand plays a C chord in octave position (C4, E4, G4, C5) with fingers 5, 3, 2, and 1. The left hand has a whole rest. The piece ends with a double bar line.

Playing With Dm

Cynthia Jordan

Position your fingers with the Dm octave position and play a full Dm chord

Piano

3 Dm chord 1st inversion Dm chord 2nd inversion

5 Position your hand in the Dm chord root position

Playing With Em

Cynthia Jordan

Position your fingers with the Em octave position and play a full Em chord

Piano

The first system shows the Em octave position on a grand staff. The right hand plays a sequence of notes: E (finger 1), G (finger 2), B (finger 3), and D (finger 5). The left hand plays a sequence of notes: D (finger 5), B (finger 3), G (finger 2), and E (finger 1). This sequence forms a full Em chord.

3 Em 1st inversion

Em 2nd inversion

The second system shows the first and second inversions of the Em chord. The first measure is labeled 'Em 1st inversion' and shows the notes G (finger 1), B (finger 2), and D (finger 5) in the right hand. The second measure is labeled 'Em 2nd inversion' and shows the notes B (finger 1), D (finger 3), and E (finger 5) in the right hand.

5 Position your hand in the Em chord root position

The third system shows the Em chord in root position. The right hand plays a sequence of chords: E (finger 3), G (finger 1), B (finger 5), and D (finger 3). The left hand plays a sequence of chords: D (finger 1), B (finger 3), G (finger 5), and E (finger 3).

7 Position your hand in the octave position

Play the full Em chord with the F octave in the bass

The fourth system shows the Em chord in octave position and the full Em chord with the F octave in the bass. The first measure is labeled 'Position your hand in the octave position' and shows the notes E (finger 5), G (finger 1), B (finger 5), and D (finger 1). The second measure is labeled 'Play the full Em chord with the F octave in the bass' and shows the notes F (finger 5), G (finger 3), B (finger 2), and D (finger 1) in the right hand, and F (finger 1) in the left hand.

Piano

Lower A octave

This system contains measures 1 through 3 of the piece. The right hand (treble clef) plays a melody in C major with fingerings: 3, 1, 4, 5, 4, 3, 2, 1. The left hand (bass clef) plays a constant bass line of two octaves below A (A2), indicated by the label 'Lower A octave' and a double line below the note.

This system contains measures 4 through 6. The right hand continues the melody with fingerings: 5, 1, 4, 1, 3, 1, 4. The left hand maintains the constant bass line of two octaves below A.

This system contains measures 7 through 9. The right hand continues the melody. The left hand maintains the constant bass line of two octaves below A.

This system contains measures 10 through 12. The right hand continues the melody, ending with a triplet of eighth notes (F, E, D) in measure 12, with fingerings 3 and 1. The left hand maintains the constant bass line of two octaves below A.

The lines connecting the Cs in the bass line are called ties. They tell us to hold the note 4 counts more which makes a total of 8 counts. Do not clear the pedal and let the notes ring.

1 2 3 1 2 3 123 123

Detailed description: This system contains measures 5 through 8. The right hand plays an F major chord (F, A, C) in a sequence of eighth notes: F (1), A (2), C (3), F (1), A (2), C (3), followed by two measures of whole notes: F (123) and A (123). The left hand plays an F octave (F) in whole notes for all four measures.

9

Right hand notes are D minor chord

1 2 3 123 1 2 3 123

Detailed description: This system contains measures 9 through 12. The right hand plays a D minor chord (D, F, A) in a sequence of eighth notes: D (1), F (2), A (3), followed by a quarter rest, then D (1), F (2), A (3), followed by two measures of whole notes: D (123) and F (123). The left hand plays a D octave (D) in whole notes for all four measures.

13

1 2 3 1 2 3 123

Detailed description: This system contains measures 13 through 15. The right hand plays a D minor chord (D, F, A) in a sequence of eighth notes: D (1), F (2), A (3), followed by a quarter rest, then D (1), F (2), A (3), followed by a measure of a whole note D (123). The left hand plays a D octave (D) in whole notes for all four measures. The piece ends with a double bar line at the end of measure 15.

Play the left hand first then play the right hand alone. As you play each note say line or space out loud. Play the song when you have learned both hands.
